

Your Solar Questions Answered

Financial managers need to generate multiple reports to analyze how their portfolio of solar PV sites are performing so owners can understand their return on investment. Maintenance providers want real time status of each site with fault details. **SMART Enterprise** for portfolio asset management is included with SolarVu energy portals to answer your questions. contactus@cachelan.com for access to your account.

REVENUE

How much money was earned last month, year, lifetime

OUTPUT

Total energy generated in any time period by site

PERFORMANCE

Which sites have the best & worst performance ratio

PRODUCTION GUARANTEES

Actual to forecast KWh & \$ variance by site

MAINTENANCE

Identify sites with faults needing maintenance
